# eSchool platform modules

## Administration Module

Has access to reports, statistics and data needed for decision-making.

## Teaching Staff Module

Enables teaching staff to enter and view all relevant data about students and subjects.

## Pupils Module

Provides insights into personal and status data, access to documents, notifications, assignments and chats.

## Exam Module

Enables creating a question database, activating tests and supervision of the exam.

## Pupils Mobile Application

Easy access to documents and information about classes.

## Parents Module

A module that enables parents to track attendance, grades and notes about their children.

# Functionalities for users

**eSchool** provides support in the work of administration, teaching staff, pupils, their parents and management of primary and secondary schools.

## Pupils and parents

Tools that help pupils engage:

- review of personal and success data
- schedule and attendance overview
- access to teaching materials, documents and notifications
- online exam taking
- online assignments submitting
- online communication with teachers

**Parents can see attendance, grades and other relevant reports.**

## Teaching staff

Easier fulfillment of teaching obligations through features for:

- insights into data about pupils
- input and review of performance, grades and attendance
- publishing teaching materials, documents and notifications
- creating and grading tests
- managing and evaluating pupils' assignments and papers

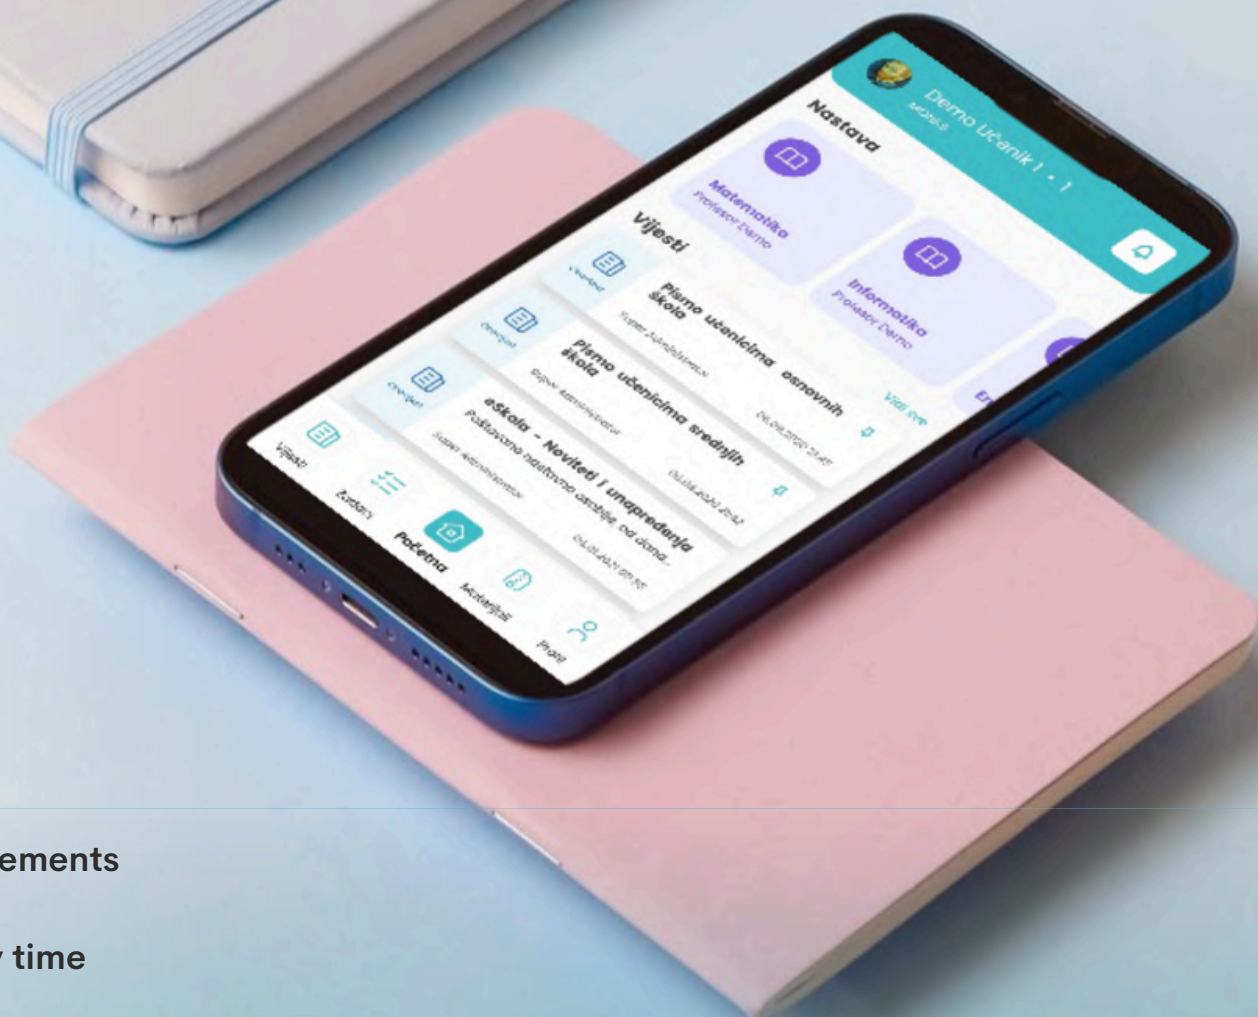

## Administration

For the management it is possible to perform tasks faster and easier:

- curriculum and staff management
- managing teaching and exam schedule
- posting important documents, announcements and reminders
- managing the main book of pupils
- issuing grade reports
- generate various reports on pupils (age, gender and success structure), attendance, enrollments, staff etc.

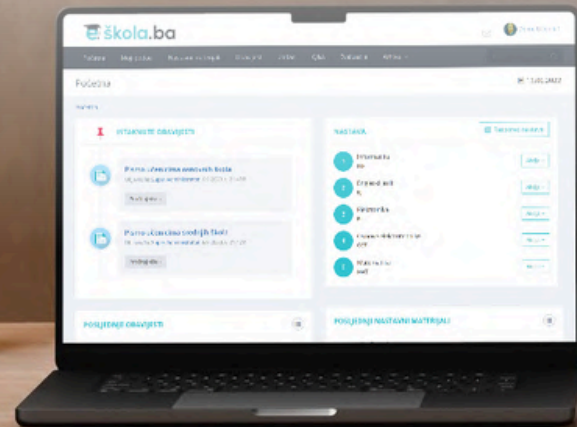

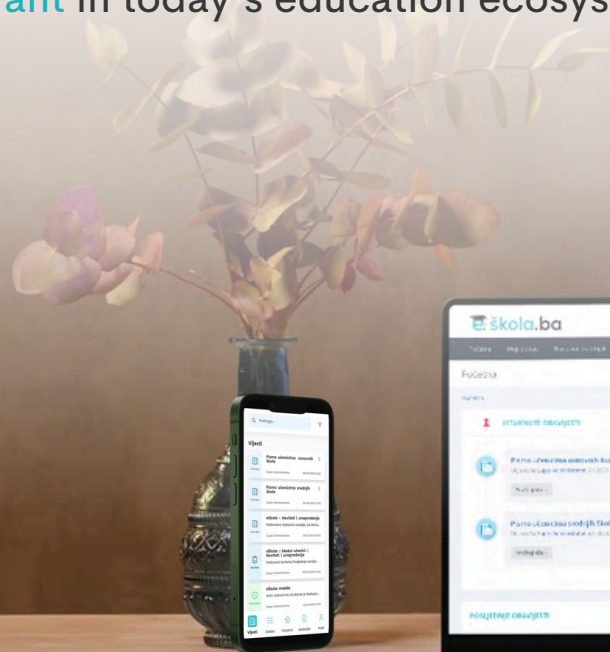

# Flexibility and interactivity for the **satisfaction** of all your pupils!

-  Live notifications about new announcements
-  Data availability from any place at any time
-  Online exam taking and teaching materials access

# eSchool is your investment in **quality**.

In the time of rapid technology advancement, eSchool stands out as a centralized solution that will **transform your processes**. Considering the comprehensiveness of the system, eSchool drives the efficiency of the teaching process, from monitoring pupils' progress to automatically generating reports. With **sophisticated e-learning** tools, you will improve the interaction between teachers and pupils. Investing in eSchool is not only a step forward into the digital era, but also ensuring that your institution remains **competitive and relevant** in today's education ecosystem.
