www.euniversity.ba

eUniversity platform modules

Student Affairs Module

Facilitates the data management, issuance of certificates and quality control.

Teaching Staff Module

Enables teaching staff to enter and view all relevant data about students and subjects.

Student Module

Provides insights into personal and status data, access to documents, notifications and forms for various requests.

Exam Module

Enables creating a question database, activating tests and supervision of the exam.

Student Mobile Application

Easy access to documents and information about classes.

Administration Module

Reports, statistics and data needed for decision-making.

Functionalities for users

eUniversity provides support in the work of student affairs, teaching staff, students and management of higher education institutions.

Students

Tools that facilitate processes for students such as:

- review of personal and status data
- schedule, attendance and success overview
- access to teaching materials and notifications
- online registration and exam taking
- online registration of seminar papers
- online admissions, certifications and various requirements

Teaching staff

Easier fulfillment of teaching obligations through features for:

- managing curriculums
- insights into data about students
- input and review of performance, grades and attendance
- publishing teaching materials and notifications for students
- managing and grading student assignments and papers
- overview of the exam schedule

Administration

For the student affairs, it is possible to perform tasks faster and easier:

- curriculum management
- keeping the students registry book
- management of the exam timetable
- issuance of different types of certificates etc...

Management sees various reports:

- statistics about students
- engagement and staff activities
- payments, debts and other finances

Flexibility and interactivity for the **satisfaction** of all your students!

Live notifications about new posts

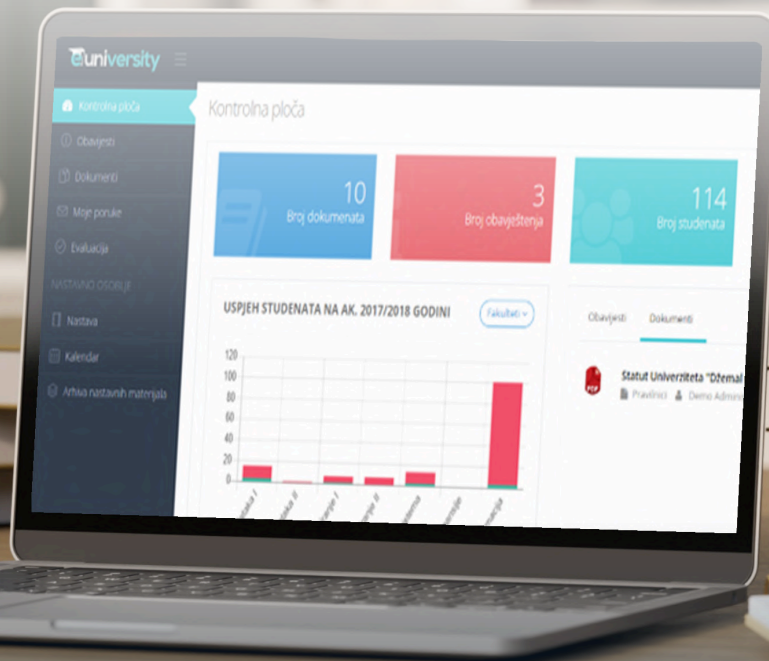

Data availability from any place at any time

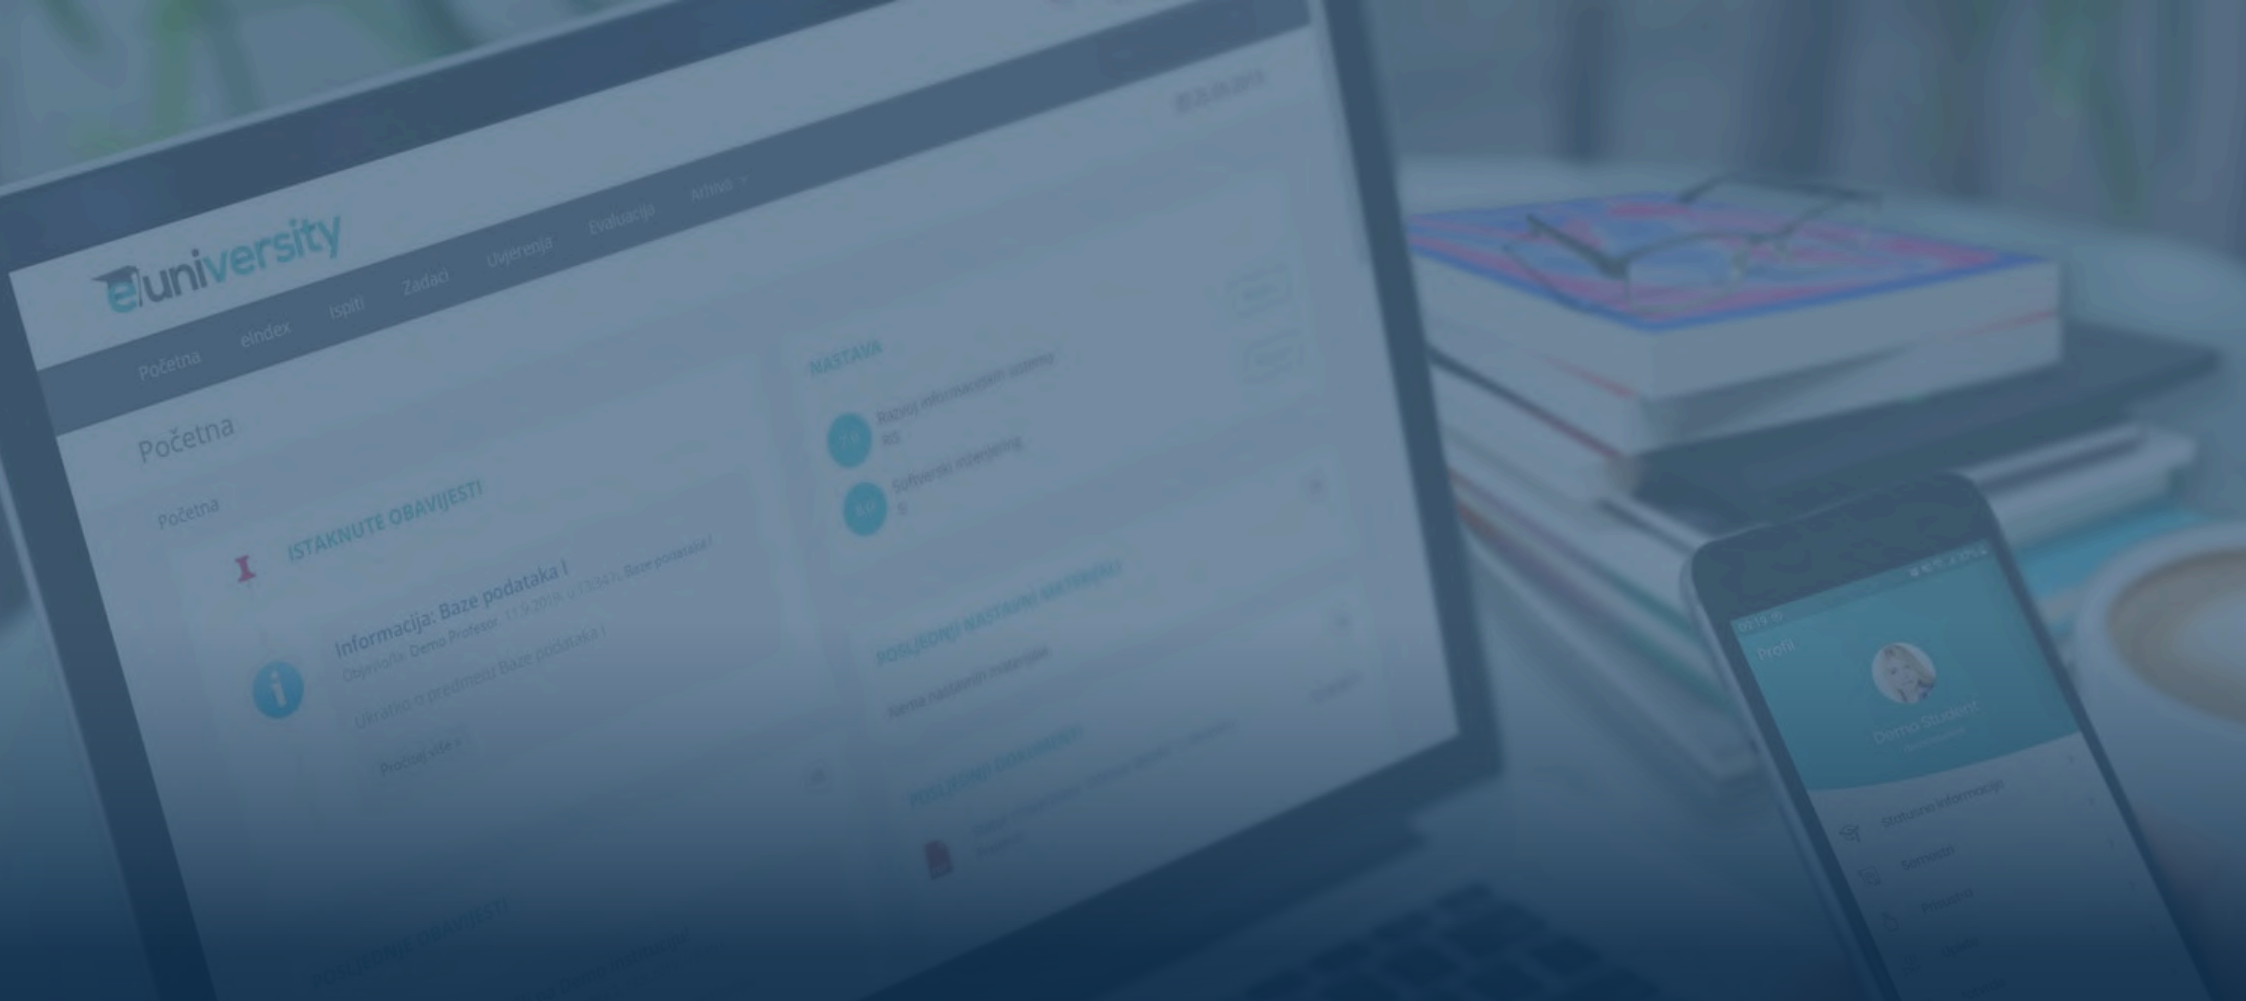

Online StudentID, exam application and teaching materials access

eUniversity is your investment in **quality**.

In the time of rapid technology advancement, eUniversity stands out as a centralized solution that will **transform your processes**. Considering the comprehensiveness of the system, eUniversity drives the efficiency of the teaching process, from monitoring student progress to automatically generating reports. With **sophisticated e-learning** tools, you will improve the interaction between teachers and students. Investing in eUniversity is not only a step forward into the digital era, but also ensuring that your institution remains **competitive and relevant** in today's education ecosystem.
